

Feline Commercial Raw Food Overview

Nationally Available Brands (updated January 2012) ©www.CatCentric.org

Product	Ratio of Meat, Organs & Bones to Other Ingredients	Ingredients	Single-Protein? *** Organs	Source	Guaranteed Analysis: Protein (Min); Fat (Min); Fiber (Max); Moisture (Max) (in brown when presented on Dry Matter Basis)	Notes	Safety Comments and/or Cautions	Environmental Focus?
Aunt Jeni's	<i>Independent company located in Temple Hills, MD</i>							
Aunt Jeni's Chicken	85:15	Bell & Evans® Chicken, Chicken heart, Chicken liver, Chicken gizzards, finely ground, real, raw Chicken bones; pureed carrots, broccoli, cabbage, sweet potatoes, and apples; farm-fresh whole eggs (including shells); ground organic flax seeds; fresh garlic; raw, unpasteurized honey; organic, unfiltered, unpasteurized apple cider vinegar; powdered organic alfalfa and kelp; fresh parsley.	Yes *** Liver Gizzard	Vegetarian fed free-range chickens from local farms with humane-treatment practices. Bell & Evans of Fredericksburg, PA. All natural, minimally processed, no artificial ingredients, no antibiotics. Chickens are fed an all vegetable diet containing no preservatives and no animal by-products. Suppliers to Whole Foods grocery chain.	Protein 14%; Fat 10%; Fiber 1%; Moisture 71%; Ash 2.2%; Carbohydrates 4%. Calcium 1.5%; Phosphorous 0.88%; (Ca:P ratio 1.7:1); Potassium 0.68%; Sodium 0.66%; Magnesium 0.09%; Zinc 84.16 mg/kg; Taurine 0.23%. AAFCO all life stages	Aunt Jeni's also makes raw frozen dog food with the same recipes, but with different proportions of meat/bone/organs to vegetables & other ingredients, as opposed to some frozen raw food companies that market the same product for dogs and cats.	All Aunt Jeni's cat foods with the exception of Turkey contain garlic. Garlic can cause anemia in cats. Aunt Jeni's says, "It is not true that garlic is dangerous for cats, or for dogs. Garlic has many wonderful health benefits, including: immune system booster, blood cleanser, and anti-bacterial properties. It is also believed to be effective in making your pet less "lovable" to pests like mosquitoes, fleas and ticks. Garlic is in the same genus as onions (Allium). However, garlic does not contain the same compound that onions do, a poisonous alkaloid called n-propyl disulphide. This compound inhibits an enzyme in red blood cells, causing them to denature. For this reason, onions should be on the Forbidden Food list for our pets, but garlic is "safe" in moderation. The amount of garlic in our cat/ferret food formulas is very small, and poses absolutely no health risk to your cat or dog. If you are still concerned about garlic-induced anemia, your veterinarian can do a blood test to determine the presence of Heinz bodies (an indicator of anemia)."	"From the beginning we have tried to be as environmentally friendly as possible in our manufacturing processes by using biodegradable cleaning agents, subscribing to wind-generated power and generally conserving resources to reduce our carbon footprint whenever and however we can. We participate in our county's recycling program for paper, cardboard, glass, plastic and aluminum. We support small, local, organic farms by purchasing as much of our produce as possible locally. We have also changed our packaging to use materials that are more eco-friendly to reduce both energy consumption and landfill space."
Aunt Jeni's Beef	85:15	Grass-fed, hormone and antibiotic-free, free-range Beef, Beef heart, Beef liver; pureed mixed squashes, mixed leafy greens (kale and collards), celery, apples; whole eggs (including shells); ground, organic flax seeds; fresh garlic; raw, unpasteurized honey; organic, unfiltered, unpasteurized apple cider vinegar; fresh parsley; powdered alfalfa and kelp.	Yes *** Liver	Grass-fed, free-range beef. "Imported from BSE-free countries such as New Zealand, Argentina, and Australia. These countries raise cattle naturally, with no hormones or antibiotics. The cattle are free-range and grass-fed. The beef used is in approximately a 95:5 lean:fat ratio."	Protein 15%; Fat 6%; Fiber 1%; Moisture 76%; Ash 1.3%; Carbohydrates 2%. Calcium 2.94%; Phosphorous 1.59%; (Ca:P ratio 1.8:1); Potassium 0.63%; Sodium 0.52%; Magnesium 0.08%; Zinc 80.80 mg/kg; Taurine 0.25%. AAFCO All Life Stages	"There are no bones in our beef variety, because beef bones are quite hard and too difficult for our equipment to handle safely...The source of calcium in our beef formula is egg shells and high-calcium vegetables instead of bones, and the Ca:P ratio is still adequate."		
Aunt Jeni's Rabbit	85:15	Naturally-raised, hormone and antibiotic-free, Rabbit, Rabbit heart, Rabbit liver, finely ground, real, raw Rabbit bones; pureed mixed squashes, mixed leafy greens (kale and collards), celery, apples; whole eggs (including shells); ground, organic flax seeds; fresh garlic; raw, unpasteurized honey; organic, unfiltered, unpasteurized apple cider vinegar; fresh parsley; powdered alfalfa and kelp.	Yes *** Uses whole rabbit excluding head, intestines and feet.	"We do not use Chinese rabbits! The rabbit we use comes from a variety of domestic sources and are raised according to strict "natural" standards, with no hormones or antibiotics used. All meat is inspected by USDA and our processors also sell the same meat that we use to restaurants for human consumption. We use the entire rabbit, including bones, as well as liver and heart. We do not use the heads, feet, or intestines.	Protein 17%; Fat 10%; Fiber 1%; Moisture 67%; Ash 2.3%; Carbohydrates 5%. Calcium 2.81%; Phosphorous 1.54%; (Ca:P ratio 1.8:1); Potassium 0.63%; Sodium 0.51%; Magnesium 0.09%; Zinc 101.46 mg/kg; Taurine 0.23%. AAFCO All Life Stages	Company Product Comments: All meats & poultry are from animals that are free-range, grass-fed, humanely raised and killed, non-medicated (no growth hormones or antibiotics), USDA inspected and graded for human consumption. Not every single ingredient is necessarily "certified" to be organic, but the farmers are following all the rules even if they have not yet achieved certified status under USDA and NOS regulations. No added vitamins, supplements, or any additives; No grains, soy, antibiotics, or hormones.		
Aunt Jeni's Turkey	90:10	Eberly or Bell & Evans® Turkey, Turkey heart, Turkey liver, Turkey Gizzard, finely ground, real, raw Turkey bones; pureed leafy greens (mustard and turnip), green beans, organic alfalfa sprouts, papaya, cranberries; ground organic sunflower seeds, organic almonds and organic walnuts.	Yes *** Liver Gizzard	See chicken.	Protein 16%; Fat 3%; Fiber 1%; Moisture 76%; Ash 1.3%; Carbohydrates 2.0%. Calcium 1.5%; Phosphorous 1.20%; (Ca:P ratio 1.3:1); Potassium .67%; Sodium 0.25%; Magnesium 0.13%; Zinc 117.07 mg/kg; Taurine 0.23%. AAFCO All Life Stages			
Bravo!	<i>Independent company located in Vernon, CT</i>							

Feline Commercial Raw Food Overview

Nationally Available Brands (updated January 2012) ©www.CatCentric.org

Product	Ratio of Meat, Organs & Bones to Other Ingredients	Ingredients	Single-Protein? *** Organs	Source	Guaranteed Analysis: Protein (Min); Fat (Min); Fiber (Max); Moisture (Max) (in brown when presented on Dry Matter Basis)	Notes	Safety Comments and/or Cautions	Environmental Focus?
Bravo! Balance-Chicken		Chicken, chicken frames, chicken organs (liver, gizzards, hearts), green beans, broccoli, acorn squash, salt, potassium chloride, vitamin E, zinc oxide, copper sulfate, ferrous sulfate, manganous oxide, potassium iodide, vitamin D.	Yes *** Liver Gizzard	"Bravo! Balance Premium Chicken Formula offers human-grade quality, antibiotic-free, no-hormones-added chicken raised and processed in the USA."	Protein 12%; Fiber 1%; Fat 4%; Moisture 78%. AAFCO All Life Stages	Company Product Comments: Facility is USDA <i>Certified</i> Products do not contain grain, preservatives or additives, and all the ingredients are always human-grade quality. Red meat products are hormone-free and grass-fed. Raw vegetables are Grade A fresh and washed prior to processing. Do not use preservatives, additives, or artificial ingredients or colors.	"We do not subcontract production of any of our products to outside third party sources." "Bravo! further ensures the safety of our diets by adhering to strict production standards. The meat processing rooms are kept between 35 to 40 degrees during production. Processed products are then immediately placed in a blast freezer where they are subjected to a temperature of -20 degrees for a minimum of 24 hours. The blast-frozen products are then transferred to our commercial freezers where temperatures between 0 and 10 degrees are constantly monitored and maintained."	No
Bravo! Balance-Beef		Beef, beef organs (livers, hearts, kidneys), beef bone, celery, acorn squash, turnip, sunflower oil, salt, potassium chloride, vitamin E, zinc oxide, copper sulfate, ferrous sulfate, manganous oxide, potassium iodide, vitamin D.	Yes *** Liver Kidney	Grass-fed Beef. "Bravo! Balance Premium Beef Formula offers human-grade, grass-fed USDA inspected beef processed at our plant in CT."	Protein 15.09%; Fiber 1.1%; Fat 7.31%; Moisture 75%. AAFCO All Life Stages			
Bravo! Balance-Turkey		Turkey necks, turkey organs (liver, gizzards, hearts), green beans, broccoli, acorn squash, salt, potassium chloride, vitamin E, zinc oxide, copper sulfate, ferrous sulfate, manganous oxide, potassium iodide, vitamin D.	Yes *** Liver Gizzard	"Bravo! Balance Premium Turkey Formula offers human-grade quality, no-hormones-added turkey raised and processed in the USA."	Protein 15.21%; Fiber 0.08%; Fat 4.42%; Moisture 68.04%. AAFCO All Life Stages		Bravo notes: A low-potency, vitamin/mineral helps fill in the gaps, especially with trace minerals. Fresh foods can be deficient in vitamins and minerals because the soil the source animals graze on or that the vegetables are grown in are depleted. Bravo Recommended Supplements: Essential fatty acids (EFAs) are found in select plants, grasses and seeds and the animals that forage on them, such grass-fed meats. While Bravo! tries to acquire grass-fed meats whenever possible, to assure your cat receives appropriate levels of Omega-3, Bravo! recommends you also include an alternative source of EFAs, such as fish oil, in your pet's diet. Fish body oil (salmon, sardine or anchovy oil) is one of the most bioavailable for our felines. Many other Omega-3s, such as flax seed oil, cannot not be converted or used by cats. Vitamin E is needed to ensure metabolism of the Omega-3s. Plus it helps prevent oxidation. Capsules in liquid or dry form are available. Digestive enzymes and probiotics aid in the digestion and absorption of nutrients and can be helpful in transitioning to raw foods. Because they can also be useful for skin and coat problems, bad breath, vomiting and diarrhea, digestive enzymes and probiotics may be beneficial for long term use, especially for animals with a history of digestion issues. Animal specific formulas are preferred.	
Bravo!'s Other Products								
Bravo! Boneless	100% meat	Available protein sources: Beef with Beef hearts; Buffalo; Venison; Salmon	Yes *** No secreting organs		NA	Premium boneless meats to customize a raw diet: With these formulas, the pet owner then must add the organ meats, supplements and vegetables to complete the raw diet recipe.

AAFCO All Life Stages	Also contains Pork	At Nature's Variety, our nutritional philosophy is to source the highest quality, safest, and most nutritious ingredients in the world. We look for our ingredients domestically first. In the case of rabbit meat, we've found that the best supply of high quality, human grade rabbit is found in China. Therefore, we are currently sourcing rabbit meat specifically for our raw and canned rabbit diets from a trusted supplier in China. To help ensure that our strict quality and safety standards are rigorously enforced, this rabbit meat is regularly inspected and monitored by the PhD food scientist we have on staff. Additionally, members of the Nature's Variety leadership team have personally visited and inspected the facility in China. We also employ extra testing (at an independent lab in the United States) to ensure that the rabbit is nothing short of our strictest standards for quality and nutrition.

AAFCO All Life Stages	Why Does Rad Cat Use Human-Grade Bone Meal Instead Of Ground-In Bone? We only use the highest quality human-grade bone meal in our foods. This is the same product you would buy in a bottle off your local health food store shelf - not the brownish green fertilizer grade product sold for animals. We receive a complete certificate of analysis from our supplier with every shipment. Here are a couple of reasons why we made the choice to use a high quality completely		It is important to us that all of the meats we use come from farms that practice sustainable agriculture.
Rad Cat Pasture-raised Lamb		Pasture-raised lamb shoulder and trim, pasture-raised lamb heart, pasture-raised lamb liver, filtered water, organic egg yolk, human-grade bone meal, organic kelp, organic dulse, gelatin, organic psyllium husk powder, wild salmon oil, manganese gluconate.	Yes *** Liver	Anderson Ranches: http://www.oregonlamb.com/	Protein 10.85%; Fat 13.95%; Fiber 0.57%; Moisture 74.12%; Ash 1.35%; Carbohydrates <1%. Calcium 0.95g/100g; Phosphorus 0.79g/100g (Ca:P ratio 1.20:1); Potassium 0.77g/100g; Sodium 0.31g/100g; Magnesium 0.08g/100g; Iron 78.86mg/kg; Copper 29.36mg/kg; Manganese 8.26mg/kg; Zinc 75.75mg/kg; Selenium 0.24mg/kg; Vitamin A 162,098 IU/kg; Vitamin D 1,526 IU/kg; Arginine 2.7g/100g; Taurine 0.40g/100g. AAFCO All Life Stages	human-grade bone meal over ground in bone: #1) Many people and veterinarians have serious concerns about feeding raw ground bones. Ground bone is challenging for a cat's digestive system. We agree that this is good, but cats with sluggish digestive systems might have problems digesting bone shards. You are a better judge as to the value of bones in your cat's diet. That is why we recommend		
Rad Cat Free-range Turkey		Free-range turkey thigh and leg meat, free-range turkey heart, free-range turkey liver, filtered water, organic egg yolk, human-grade bone meal, organic kelp, organic dulse, gelatin, organic psyllium husk powder, wild salmon oil, manganese gluconate.	Yes *** Liver	Diestel Family Turkey Ranch: http://www.diestelturkey.com/home.htm	Protein 15.50%; Fat 5.23%; Fiber 1.70%; Moisture 78.70; Ash 1.72; Carbohydrates <1%. Calcium 1.60g/100g; Phosphorus 1.30g/100g (Ca:P ratio 1.23:1); Potassium 0.93g/100g; Sodium 0.23g/110g; Magnesium 0.10g/100g; Iron 108.46mg/kg; Copper 16.33mg/kg; Manganese 9.93mg/kg; Zinc 88.48mg/kg; Selenium 0.64mg/kg; Vitamin A 49,795 IU/kg; Vitamin D 4,943 IU/kg; Arginine 43.70g/100g; Taurine 0.40g/100g. AAFCO All Life Stages	condition a cat might find it - whole and chewable! You are at the mercy of the manufacturers on the size of bone shards in their grind. In a typical 'kill' for your backyard carnivore, he or she would most likely consume far less bone than is in a typical serving of food with bone ground in. #2) It is difficult to guarantee the ratio of bone to meat unless every bone ground is exactly the same size. We have chosen to use a		
Raw Advantage <i>Independent company located in Kettle Falls, WA</i>								

Feline Commercial Raw Food Overview

Product	Ratio of Meat, Organs & Bones to Other Ingredients	Ingredients	Single-Protein? *** Organs	Source	Guaranteed Analysis: Protein (Min); Fat (Min); Fiber (Max); Moisture (Max) (in brown when presented on Dry Matter Basis)	Notes	Safety Comments and/or Cautions	Environmental Focus?

Calcium 2.65%; Phosphorus 2.32% (Ca:P ratio 1.13:1); Copper 17ppm; Iodine 4ppm; Magnesium 0.09ppm; Manganese 7.6ppm; Potassium 0.68%; Selenium 1.26ppm; Sodium 0.242%; Zinc 78ppm; Vitamin A 18,350 IU/lb; Vitamin D 810 IU/lb; Arginine 0.63%; Taurine 0.26%. AAFCO All Life Stages	Also available freeze-dried	"Pre-mortem (live animal) inspections are conducted by veterinarians to certify antibiotic and disease free animals. Suspect animals (for any reason) are segregated and removed from the human and pet food chain...At the harvest facility there are more than 15 pathogen reduction stations. Raw materials are subjected to highly sensitive metal detection at the USDA inspected meat processing plants. Commitment to quality is not taken lightly as more than 30 USDA and plant quality assurance technicians are on staff to inspect, audit and ensure that all quality criteria are met. Dry ice is applied to raw materials immediately after removal from the freshly harvested animal to initiate the cooling process. Raw materials are placed in sanitized, earth-friendly, re-usable totes and immediately placed into a blast freezer @ -10F to "lock in" freshness. Raw materials are removed and processed after 24 hours of blast freezing. Meat temperature is maintained at or below 32 degrees F throughout processing. All finished products are inspected, real-time, in-line by trained plant personnel."	"Humane treatment and animal handling is paramount." Support local farming.

Ingredients of concern: The amounts in these formulas may not be a problem, but the presence of these ingredients is worth noting.

Grains

Frequent allergens, may be the cause of digestive upsets and inflammation.

Dark Leafy Greens

(Kale/Collards/Spinach) Have been associated with calcium oxalate crystals in cats with a predisposition towards the problem.

Garlic

A potential cause of anemia in cats.
