

Notes to Canned & Raw Cost Comparison Table

5) For one 10 pound adult cat; low end of range used when a range is provided.

Raw-fed cats require 2%-4% of their body weight: as the low-end of a range is used for commercial canned RDA, 2% is used for RDA for raw food.

6) Priced at <http://www.petfooddirect.com> unless not offered by the distributor.

Excludes price discounts for autoshipping options and does not reflect sale pricing.

Assumes free shipping other than where indicated for raw products.

(Commercial raw products are presented both with and without estimated shipping)

6a) Petsmart brand. Priced at <http://www.petsmart.com>

6b) Priced at manufacturer website

6c) Priced at <http://www.amazon.com>

6d) Petco brand. Priced at <http://www.petco.com>

6e) Priced at <http://www.naturalk9supplies.com>

6f) Priced at <http://www.onlynaturalpet.com>

7) Ash content assumed to be 2.5% in canned foods when not provided.

8) S&C frozen is only available as marketed for dogs, but it is supplemented with taurine sufficient for cats, and 95% meat/bones/organs
